Since the arrival of COVID-19 in March 2020, there have been a total of 5,358 confirmed (PCR test) and 1,884 probable (antigen test) COVID-19 cases reported in Cranford Township*. The chart to the right shows the trend in newly reported cases throughout the pandemic. NJDOH and local health departments across New Jersey continue to monitoring these changes in variant dominance as well as any changes in transmission, hospitalizations, and deaths. More information on these trends can be found on the [NJDOH COVID-19 Data Dashboard](#).
